The Ultimate Firewall (TUF)™

“Watsec’s analysis of our network was quick, cost-effective and thorough.”

-R. Gariepy, Clearpath Robotics, Co-Founder

Security Requires a Well-Trained Workforce

Without effective employee training, even the most comprehensive security policies can't protect your organization from security threats.

The most security hardened systems may be rendered vulnerable to hacker attacks if an organization does not promote a security conscious corporate culture.

Empowering Your Employee's

WatSmart™ takes a proactive and evidence based approach to employee security. Recognizing that maximizing efficiency is a priority for every organization, *WatSmart™* provides employees with techniques to integrate secure practices into their daily work.

The screenshot displays the 'My Start Page' of the WatSec Education Server. It includes a navigation menu with 'My Courses', 'Browse Courses', 'Profile', and 'Preferences'. The main content area shows 'My Courses' with a table listing a course titled 'Information Security Primer'. To the right, a 'Things Current' section lists recent assignments and quizzes, such as 'Assignment: Recent Security Incidents' and 'Quiz: Policies'. Large orange arrows point from the text 'Modules include everything you need to know to improve security best practices' to the course table, and from 'Quizzes reinforce knowledge retention' to the quiz list.

Some topics include:

- The “what, why, where, and how” basics of IT security.
- Definitions for vulnerabilities, threats and risks.
- Safe management of confidential data.
- What the criminals look for.
- Best practices for safe web surfing and email use.
- Protecting mobile data in laptops, tablest & smartphones.
- What to do when a security breach occurs.
